

*Statkraft is a leading company in hydropower internationally and Europe's largest generator of renewable energy. The Group produces hydropower, wind power, solar power, gas-fired power and supplies district heating. Statkraft is a global company in energy market operations. Statkraft has 3800 employees in more than 20 countries.*

**For our office in Düsseldorf we are currently looking to hire**

## **Interns in Short Term Trading and Optimization (m/f)**

As part of the Norwegian state owned Statkraft Group with 3800 employees in more than 20 countries, Statkraft Markets is the 6th largest energy producer in Germany with offices in Düsseldorf, London, Istanbul and Amsterdam. Since 1999 we have been an active trader of power, gas, renewable and emission certificates and a broad range of structured products. For us the ideas of our more than 450 committed and ambitious colleagues make the difference. Share our passion for renewable energy and be a part of tomorrow's energy world.

### **Your role:**

You will be part of a professional team that manages Europe's largest wind portfolio and over 2,000 MW of flexible generation capacity in Germany, UK, Turkey, and Albania. We are an active trader in all physical short-term power and gas markets in the respective countries.

The energy landscape is changing rapidly and so is our business. Our young and international team continuously improves the optimization tools, forecasts and trading strategies using data science techniques: data mining and visualization, developing hypotheses, testing statistical models and employing machine learning and artificial intelligence algorithms. All this happens in close collaboration with our traders, power plant operators and other stakeholders like project and business developers. New business opportunities arise on a daily basis and need to be valued and eventually operationalized. We are the first point of contact for technical/economic requests concerning our assets from project development, legal, grid operators and our generation arm.

Your internship will be in the centre of these front-office activities and you will be given responsibility from day one. Over the course of your internship you will become familiar with many aspects of the energy market, data structures and the trading business. Since your work is at the heart of our business and therefore commercially significant you will always have expert support but we also expect you to work independently. There is always room for exploring new ideas and business. Our interns are highly qualified employee and you will actively contribute to the further development and growth of Statkraft Markets, working closely with various departments in Germany, Norway, Albania, Turkey and the UK.

**Your profile:** Student of natural sciences, economics, engineering or computer science, with

- Strong analytical and numerical skills
- Programming and modelling experience (preferably Python)
- Team player with good communicative skills
- Proactive and independent way of working
- Fluent in English

### **Statkraft offers:**

- Professional and personal development in an exciting company
- A positive working environment characterised by competence, responsibility and innovation
- A diverse workplace with regard to gender, age and cultural background
- Competitive terms of employment and excellent benefit schemes

**Duration:** 4 - 6 months,

**Expected start date:** Flexible start date

### **Challenged?**

Please apply through our online application form on [www.statkraft.com](http://www.statkraft.com) and mention your preferred start date. Please be informed that we are looking for applicants who are enrolled at a university during the whole internship period.
